## Software Developer

Highly motivated software developer with working experience in building complex application.  
Worked with various projects and have a good understanding of managing project life cycles.  
Experience in developing, testing, and debugging code, and code refactoring.  
Quick learner who can adapt to any working environments and always keep up to date with new technologies.

## Skill

Language: JavaScript, TypeScript, Python, Java, C#, Solidity, SQL, NoSQL  
Framework: ReactJS, Redux, NodeJS, ASP NET Core, Bootstrap, SemanticUI  
Technology: RestAPI, GraphQL, Blockchain, Smart Contract  
Project: Scrum, Agile, Git Flow

## Work Experience

### Junior Software Developer

Infinity Blockchain Labs, Ho Chi Minh City, Vietnam

- Program and deploy Ethereum smart contract using Solidity and Geth node
- Design and program, and deploy application services using NodeJS, RestAPI, and GraphQL.
- Develop web application using ReactJS.
- Work with QC to develop automation framework components in order to optimize release cycles
- Work to improve speed, security, and scalability of all systems

## Education

Bachelor of Engineering: Information Technology

South Eastern Finland University of Applied Science, Finland

Related Coursework: Full Stack Open

University of Helsinki

## Personal Projects

- **Project Name:** Emaily (<https://polar-oasis-64498.herokuapp.com/>)  
**Language of Implementation:** ReactJS, NodeJS, MongoDB, Sendgrid API
- **Project Name:** Social Microservices (Framework, <https://github.com/phongtra/Microservice-Framework>)  
**Language of Implementation:** ReactJS, ASP.NET Core, PostgreSQL, RabbitMQ, Identity Server
- **Project Name:** XAMK service deployment project (<https://agile-ridge-67524.herokuapp.com/>)  
**Language of Implementation:** ReactJS, NodeJS, MongoDB
- **Project Name:** Full Stack Open Bloglist(<https://fast-cove-89415.herokuapp.com/>)  
**Language of Implementation:** ReactJS, NodeJS, MongoDB, Webpack
- **Project Name:** Full Stack Open GraphQL Server (<https://github.com/phongtra/Full-Stack-Open/tree/master/graphql>)  
**Language of Implementation:** ReactJS, NodeJS, MongoDB, GraphQL
- **Project Name:** Blockchain Petition (<https://lit-badlands-58162.herokuapp.com/>)  
**Language of Implementation:** ReactJS, NodeJS, Solidity
